

# Energy-Smart Home Options

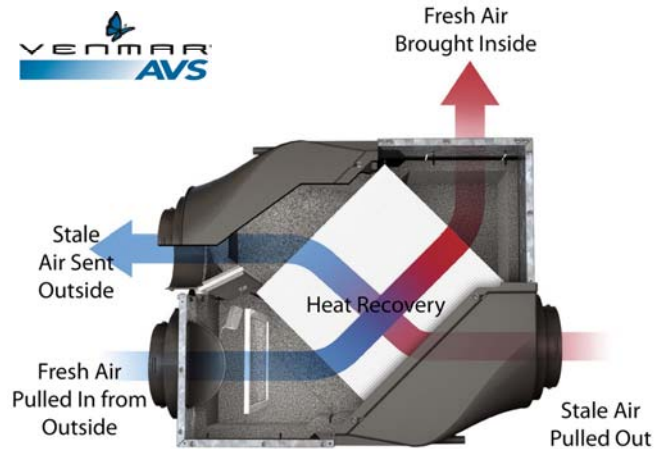

*products for high performance homes*

## Mechanical Ventilation That Saves Energy

Any well insulated building requires controlled air flow. Foard Panel highly recommends the installation of a quality ventilation system. Energy Recovery Ventilation (ERV) systems are designed to manage indoor air quality in buildings with “tight” envelopes.

**Order a Venmar – ERV through Foard Panel - 10% less than retail**  
**Recommended Ventilation Kit:**

House Size	Unit Size	Cost
0-1800 sf	100CFM	\$1175.00
1800-2500 sf	150CFM	\$1350.00
2500-3000 sf	200CFM	\$1700.00

Venmar Ventilation Systems replace stale air from inside your house with fresh air from outside. This system recovers heat and sends it back into your home. This process reduces heat loss and saves energy.

## Rain Screens That Prevent Moisture Issues

Moisture prevention is important to consider in any construction project. Home Slicker® is a rainscreen that prevents moisture from being trapped under your siding. This product is fast and easy to install and provides a high performance drainage system.

**Order Home Slicker® through Foard Panel -10% less than retail**  
*Home Slicker comes in 150 square foot rolls*  
*After your discount, you pay \$85.00 per roll*

Home Slicker® prevents wind-driven rain from settling behind cladding.

## SIP Tape That Prevents Moisture Issues

In certain situations moist air is able to travel through small, unsealed openings in panel joints. SIP tape applied to double splined walls can prevent moisture problems. In the northeast, SIP tape is strapped on interior wall or roof sections prior to finishing.

**Order SIP TAPE through Foard Panel**  
*SIP Tape comes in 100 foot rolls.*  
*One case has 2 rolls.*  
*You pay \$95.00 per case*
